DETAILED ACTION

Election/Restrictions

Claims 8-10 and 12-44, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 2/24/06 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 1-46 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-7, 11 and 45-46, there is no teaching or suggestion in the art of record disclosing a magnetic element comprising the combination of structural limitations of claim 1, wherein the magnetic element is configured to allow the free layer magnetization to be switched due to spin transfer when a write current is passed through the magnetic element. Therefore, independent claim 1 is deemed allowable along with its dependent claims 2-7, 11 and 45-46.

Regarding claims 8-10 and 12-26, there is no teaching or suggestion in the art of record disclosing a magnetic element comprising the combination of structural limitations of claim 8, wherein the magnetic element is configured to allow the free layer magnetization to be switched due to spin transfer when a write current is passed through the magnetic element. Therefore, independent claim 8 is deemed allowable along with its dependent claims 9-10 and 12-26.

Regarding claims 27-43, there is no teaching or suggestion in the art of record disclosing a magnetic element comprising the combination of structural limitations of claim 27, wherein the magnetic element is configured to allow the free layer magnetization to be switched due to spin transfer when a write current is passed through the magnetic element. Therefore, independent claim 1 is deemed allowable along with its dependent claims 28-43.

Regarding claims 44, there is no teaching or suggestion in the art of record disclosing a method for providing a magnetic element comprising the combination of structural limitations of claim 44, wherein the magnetic element is configured to allow the free layer magnetization to be switched due to spin transfer when a write current is

passed through the magnetic element. Therefore, independent claim 44 is deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
